

Screw-In™ Drive Screw Anchors

Description

The Screw-In Drive Screw Anchor is a **2-piece drive screw anchor** comprised of a corrosion resistant zamac anchor body and steel Phillips screw pin. The #2 Phillips screw pin can be **easily removed** after the anchor is properly set. The Screw-In anchor is ideal for light-duty applications in concrete, block, brick or stone.

Key Features & Benefits

- ▶ Pre-assembled, ready to use
- ▶ Screw can be easily removed after anchor is properly set
- ▶ Easy to install in concrete, block, brick or stone

Applications

- ▶ Roof Flashing
- ▶ Masonry Anchorage and Brick Ties
- ▶ Electrical Fixtures
- ▶ Mechanical Attachments
- ▶ Furring Strips
- ▶ Brackets

Specifications, Listings and Approvals

Diameters: 1/4"

Materials:

Anchor Body: Die Cast Zamac Alloy

Screw: Zinc-Plated Cold Rolled Steel

Installation Information

Instructions

1. Drill the hole perpendicular to the work surface at least 1/4" deeper than the calculated embedment depth. Clean the hole using compressed air and a nylon brush.
2. Insert anchor assembly through mounting holes in fixture and into anchor hole.
3. Gently hammer screw flush to expand body.
- 4 **To remove:** Using a Phillips screw driver, turn counter clockwise until screw is removed from anchor body. Set the claw of a hammer between the anchor body and fixture and pull loose.
